

TOWNSEND INSTALLS PRINTING MACHINE

Now Possible to do Printing at Any
Time—Expensive and Modern
Apparatus.

T. W. Townsend has just installed in his studio a brand new electric printing machine. This machine is a modern and expensive addition and is found only in galleries equipped and managed in the most enterprising way.

By the use of this new device the photographer can do work which has heretofore been possible only in the sunlight. The light with which it is equipped is equal in strength to a combination of six arc lights and rush orders can be attended to not only on any kind of a day but after night if necessary. Mr. Townsend assures his customers that the Christmas orders will not be delayed now.
