

Honest Medicines Versus Fakes

President Taft's recent message suggesting an amendment to the Pure Food and Drug law in its relations to prepared medicines does not refer to such standard medicines as Foley's Honey and Tar Compound and Foley's kidney pills. Both of which are true medicines carefully compounded of ingredients, whose medical qualities are recognized by the medical profession itself as the best known remedial agents for the diseases they are intended to counteract. For over three decades Foley's Honey and Tar Compounds have been a standard remedy for coughs, colds and affections of the throat, chest and lungs for children and for grown persons, and it retains to-day its preeminence above all other preparation of its kind. Foley's kidney pills are equally meritorious and effective.
